

DentMax Market Segmentation Analysis

K-Means | 4 Segments | n = 2,300

1

Price-Sensitive Evaluators

49% (1,127)

Largest segment but lowest engagement, loyalty, and profitability. Driven primarily by cost. Limited growth potential.

2

Relationship-Driven Loyalists ★

22% (506)

High booth engagement, long relationships, strong historical sales. Value software integration, image quality, and service. Still price-aware.

3

DentMax Champions & Advocates ★

12% (276)

Most profitable and loyal. Highest sales frequency, most referrals, least price-sensitive. Value quality and flexible diagnosis tech.

4

Cost-Driven Support Seekers

17% (391)

Long history but maintenance-focused, not recurring buyers. Seek low price and personalized service. Minimal referral activity.

METHOD

K-Means cluster analysis on trade show behavior, sales history, and survey data. Optimal k=4 selected via Cubic Clustering Criterion (CCC), which peaked at 4 clusters — balancing parsimony with model fidelity.

STRATEGIC RECOMMENDATION

Prioritize Clusters 3 & 2

Why These Segments

Together they represent 34% of the market but deliver disproportionate value: highest sales frequency, strongest loyalty, most referrals, and the lowest price sensitivity. These are DentMax's most profitable and defensible segments.

Positioning & Messaging

Cluster 3: Retain & amplify. Leverage referral programs, premium service tiers, and exclusive access to new tech.

Cluster 2: Convert to champions. Use in-person demos, certifications in ads, dental journal citations, and highlight software integration + image quality at balanced pricing.
